Senior Fullstack Engineer - Typescript/React/Node

Full-stack engineer with 13+ years delivering high-performance products across SaaS, e-commerce, and fintech using Next.js/React, TypeScript, and Node. Shipped 50+ production apps serving 200K+ users, improving performance up to 40% and conversion up to 35% with 99.9% uptime. Deep experience in modern auth (Clerk/Better-Auth), payments (Stripe), scalable data (PostgreSQL/Drizzle/Convex), and CI/CD on AWS/Vercel. Product-minded, metrics-driven, available with consistent overlap for EU/Asia/Australia time zones. Seeking a long-term product engineering role to own features end-to-end, collaborating on web applications and microservices architecture, mentoring developers, and strengthening phishing simulation and security-focused software systems with excellent written and verbal communication in English and robust development practices for relational databases.

Core Competencies

Relevant Skills Clerk, Better-Auth, Stripe; sessions, RBAC, MFA, secure token handling (phishing simulation context; developers collaboration; excellent written and verbal communication in English; wellbeing and financial support), PostgreSQL, MongoDB, TursoDB, Drizzle ORM, Convex; indexing, query optimization, migrations (relational databases), Docker, AWS, Vercel, GitHub Actions, CI/CD pipelines, environment gating, preview deployments (software systems in AWS; monitoring with Sentry/Datadog/Grafana), Node.js, Express.js, REST, GraphQL, tRPC, Server Actions, caching, rate limiting, background jobs (microservices architecture), React 18+, Next.js (App Router, RSC), TypeScript, Tailwind CSS, shadcn/ui, responsive design, Core Web Vitals (web applications)

Frontend React 18+, Next.js (App Router, RSC), TypeScript, Tailwind CSS, shadcn/ui, responsive design, Core Web Vitals

Backend Node.js, Express.js, REST, GraphQL, tRPC, Server Actions, caching, rate limiting, background jobs

Data PostgreSQL, MongoDB, TursoDB, Drizzle ORM, Convex; indexing, query optimization, migrations

Cloud/DevOps Docker, AWS, Vercel, GitHub Actions, CI/CD pipelines, environment gating, preview deployments

Auth/Payments Clerk, Better-Auth, Stripe; sessions, RBAC, MFA, secure token handling

Languages English

Professional Experience

Freelance

Jan 2025 - Present

Full-Stack Web Engineer (Independent Contractor), Mumbai, India

- Shipped 50+ end-to-end web apps (SaaS, e-commerce, fintech) serving 200K+ MAUs with 99.9% uptime; owned architecture, development of scalable software systems, and maintenance in an AWS environment.
- Integrated 30+ third-party APIs (Stripe, Clerk, REST/GraphQL), enabling revenue and identity flows with secure token handling and rate limiting, and collaborated on microservices-aligned API design for complex web applications.
- Implemented CI/CD with GitHub Actions + Vercel previews, reducing deployment time by 60% and eliminating manual errors via gated environments.
- Architected PostgreSQL + Drizzle/TursoDB solutions, improving query performance by 45% through indexing, caching, and efficient server-side fetching for relational databases used by React/Node services.
- Built n8n automations that eliminated 70% manual data entry, saving 20+ hours/week; integrated CRM and email notifications to support phishing-simulation-style campaign workflows and monitoring.
- Collaborated in Agile sprints, pairing and PR reviews with cross-functional teams; coached developers while delivering projects 15% ahead of schedule with excellent written and verbal communication in English.
- Added observability (Sentry/logs/alerts) and performance budgets; reduced API latency by 50% and improved LCP to ~1.8s while monitoring services similar to Datadog and Grafana in AWS.

ProConvey

May 2024 - Nov 2024

Full-Stack Engineer, United Kingdom

- Delivered 20+ reusable UI components (Next.js + Tailwind + React), standardizing tokens and accelerating releases by 25% across web applications.
- Improved load performance by 35% via App Router, lazy loading, and CDN caching; reduced API latency by 50% using server-side data fetching and caching on AWS to support scalable software systems.
- Implemented Clerk authentication (MFA, session management, RBAC), lifting signup completion by 30% and hardening phishing-resistant flows through secure tokens and domain-based policies.

- Built a shadcn/ui component library, cutting development time for new features by 40%; ensured 100% responsive fidelity.
- Documented architecture decisions (RSC caching, error boundaries, rollback plans) and introduced test coverage gates in CI/CD, writing clear documentation and specs with excellent written and verbal communication in English.

Urban Zen

May 2017 - Feb 2022

Full Stack Developer, USA

- Led storefront overhaul increasing online sales by 25% and cutting cart abandonment by 18% via optimized checkout extensions and upsells.
- Achieved 90+ Lighthouse scores with image optimization, lazy loading, and CDN; improved mobile conversion by 32% through responsive UX in React-based web applications.
- Integrated 10+ Shopify apps and services; customized Liquid/JS/CSS for branded, high-performance experiences backed by relational databases and microservices-friendly APIs, supporting SaaS-grade reliability.
- Implemented SEO best practices, increasing organic traffic by 40% and improving key category rankings.

Selected Achievements

Selected Achievements

Performance: Up to 40% faster page loads; consistent 90+ Lighthouse scores; LCP ~1.8s. Growth: Conversion lifts up to 35%; mobile conversion +32%; cart abandonment -18%. Reliability: 99.9% uptime; deploy time -60%; API latency -50%. Efficiency: 70% manual data entry eliminated; 20+ hours/week saved via automation.
